

KALABE KEBEDE

Senior Software Engineer | Java, Distributed Systems & Applied AI

Maryland | (240) 288-1031 | kalabkebe12@gmail.com | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of experience building Java/Spring Boot microservices, distributed systems, and full-stack applications across banking, insurance, and analytics. Experienced with Kafka, REST APIs, SQL, AWS, React/Next.js, and Python/FastAPI. Recent Forward Deployed Engineering work includes brownfield modernization, RAG, LangGraph orchestration, tool-using AI agents, and production-style observability.

TECHNICAL SKILLS

Backend & Distributed Systems: Java 8-21, Spring Boot, Spring Security, Spring Data JPA, REST APIs, Microservices, Kafka, Event-Driven Architecture, Concurrency, Idempotency, Transactional Outbox
Cloud, Data & DevOps: AWS, S3, RDS, Athena, Glue, SQL, PostgreSQL, MongoDB, Redis, Oracle, MySQL, ETL/ELT, Docker, Kubernetes, Terraform, GitHub Actions, Jenkins, CI/CD
Full Stack: React, Next.js, TypeScript, JavaScript, Python, FastAPI, Tailwind CSS, Thymeleaf, Bootstrap
Applied AI & Retrieval: RAG, LangChain, LangGraph, Agentic AI, Tool-Using Agents, AWS Bedrock, LangSmith, pgvector, Hybrid Retrieval, Reranking, MCP, AI Evaluation
Security, Testing & Delivery: OAuth2/OIDC, JWT, RBAC, OpenTelemetry, Prometheus, Grafana, JUnit 5, Mockito, Pytest, Playwright, Testcontainers, Brownfield Analysis, Requirements Synthesis, ADRs, Stakeholder Collaboration

PROFESSIONAL EXPERIENCE

Revature Forward Deployed Engineer Remote	May 2026 - Sep 2026
- Modernized inherited lending and assessment platforms by tracing workflows across APIs, services, databases, and authorization boundaries, then delivering verified changes without breaking existing contracts. - Built FastAPI and Next.js features across scoring, reporting, servicing, reconciliation, and role-based workflows; strengthened idempotency, row locking, auditability, logging, metrics, and CI/CD. - Added grounded RAG, a bounded LangChain/AWS Bedrock agent, deterministic LangGraph orchestration, and LangSmith tracing while keeping AI advisory and core business decisions authoritative in application services.	
Lovelytics Data & Analytics Engineer Remote	Dec 2024 - Nov 2025
- Translated stakeholder reporting requirements into SQL data models, KPI definitions, and dashboards using PostgreSQL, MySQL, and AWS data services. - Built ETL/ELT and data-quality workflows with Athena, S3, Glue, and RDS; improved analytical SQL through indexing, aggregation, window functions, and caching.	
Scale AI / Outlier AI AI Data Specialist - Flexible / Task-Based Contract Remote	Apr 2024 - Feb 2025
Evaluated AI-generated datasets and responses for factual accuracy, instruction adherence, semantic quality, and alignment with task requirements; performed reviewer-level quality checks on peer work.	
JPMorgan Chase Java Software Engineer - Contract Columbus, OH Hybrid	May 2024 - Sep 2024
- Modernized enterprise banking services with Java and Spring Boot, improving API/database efficiency, maintainability, and deployment reliability in a compliance-sensitive environment. - Built secure services and integrations using Spring Security, Spring Data JPA, Oracle, Redis, AWS, and REST APIs; improved reliability through query tuning, caching, automated testing, Docker/Kubernetes, and production support.	

Investors Bank | Java Software Engineer

Apr 2021 - Dec 2023

Remote

- Modernized legacy banking workflows into Spring Boot microservices and Kafka-based event-driven services using PostgreSQL and Redis while preserving transaction and data integrity.
- Improved backend performance through SQL refactoring, indexing, caching, and asynchronous processing; automated build/test delivery with Jenkins and GitHub Actions and supported distributed-system troubleshooting.

Erie Insurance | Java Software Engineer

Mar 2019 - Feb 2021

Erie, PA | Hybrid

- Developed Java backend services and REST APIs for claims, policy, customer, and transaction-processing workflows.
- Implemented concurrency-safe processing, Hibernate/JPA persistence, MySQL query optimization, JUnit/Mockito testing, and production troubleshooting for business-critical services.

SELECTED ENGINEERING PROJECTS

Northbank - Event-Driven Retail Banking Platform | [GitHub](#)

Java 21/Spring Boot banking platform with 11 business services, Kafka, PostgreSQL, Redis, and Next.js/React/TypeScript, designed around transaction integrity, idempotency, concurrency-safe money movement, and transactional outbox patterns; 1,482 application tests run in CI.

Meridian Lending - Consumer Lending & Applied AI Platform | [GitHub](#)

Brownfield FastAPI lending platform with 8 backend services; added a bounded LangChain/AWS Bedrock agent, deterministic LangGraph orchestration, RAG/tool calling, LangSmith, and Next.js while keeping AI advisory.

Policy RAG Platform - Secure Retrieval & Grounded AI | [GitHub](#)

FastAPI and PostgreSQL/pgvector retrieval platform with hybrid search, HNSW, reranking, retrieval-time authorization, LangGraph evidence gating, MCP, and OpenTelemetry; 490 automated tests.

MarketHub - Full-Stack Java Marketplace | [GitHub](#)

Java 17/Spring Boot MVC marketplace with Spring Security, JPA/MySQL, and Admin/Seller/Buyer workflows; record-level ownership and CSRF protections covered by 87 automated tests.

EDUCATION & CERTIFICATION

B.S. Computer Science - Maharishi International University - 2023

B.S. Electrical & Computer Engineering - Haramaya University - 2015

Data Analytics Certificate - Per Scholas
